On behalf of the American Society of Head and Neck Radiology I’m delighted to welcome you to the 53rd Annual Meeting of the ASHNR, which will be held in Scottsdale, Arizona from Wednesday, October 2 – Sunday, October 6, 2019. *Head and Neck Imaging in the Valley of the Sun* will kick off with the Early Bird Session on Wednesday morning titled *Errors are Opportunities: Mistakes, Misses & Difficult Diagnoses*. A theme of mentoring will be emphasized in this opening session, reprised in the popular “Pearl from My Mentor” presentations, and discussed in detail during a Mentoring Meal, to be held during the meeting for trainees and faculty who have newly embarked on their careers.

Lectures will incorporate basic core and advanced, specialized topics on a wide variety of head and neck imaging topics, including applied anatomy and disease processes involving the orbits, sinonasal regions, skull base, temporal bones, lymph nodes & glands, H & N spaces, teeth and jaws. There will also be a new session on Artificial Intelligence. In total there will be 28.75 AMA PRA Category 1 Credit(s)™ and 5 SAM sessions, with talks from approximately 80 talented speakers, considered experts in their field, including 10 rising stars whom we warmly welcome to the ASHNR meeting podium.

The beautiful and tranquil Westin Kierland Resort & Spa, located near the McDowell Mountains in Scottsdale, with panoramic views of surrounding mountains, celebrates the rich legacy of Arizona. Accessible from major cities by direct flights to Phoenix, the resort is located about 20 miles from the airport. Resort features include a world class Golf Club, the Agave Spa, a 24 hour fitness studio, swimming pools, tennis courts, bike rentals, babysitting services, a kids club and several excellent restaurants. Cats and dogs are also welcome! Abundant dining, retail and entertainment options are located within walking distance. Scottsdale and nearby Phoenix offer a wealth of activities including innumerable great hiking trails, hot air ballooning, OdySea Aquarium, Butterfly Wonderland, Desert Botanical Garden, and a variety of museums and art galleries.

In closing, I am honored to invite you to attend the 53rd Annual ASHNR meeting for abundant excellent educational opportunities, to reconnect with and make new friends and to enjoy the gorgeous Valley of the Sun.

• Identify temporal bone anatomy and develop a diagnostic approach to different types of hearing loss, inflammatory and neoplastic disorders and the post-operative temporal bone.
• Assess anatomy and abnormality in relation to cranial nerves, the brachial plexus and sympathetic chain while also recognizing denervation atrophy.
• Develop an understanding of artificial intelligence.
• Demonstrate increased knowledge of the anatomy of the head and neck spaces and diagnostic considerations for each space.
• Recognize atraumatic emergencies related to the pediatric and adult airway, neck infections, the temporal bone and orbit.
• Diagnose and distinguish between vascular anomalies, developmental lesions and malignant pediatric head and neck tumors.
• Review cancer staging, different etiologies and anatomic locations of head and neck cancer, perineural tumor spread, advanced imaging techniques and post therapeutic imaging.
• Identify normal anatomy and disease affecting the nodal and glandular tissues of the neck.
• Develop an approach to jaw lesions, dental nomenclature and temporomandibular joint imaging.
• Describe the various types of traumatic injury in the head and neck, associated complications, and the use of 3D computer generated imagery models in the assessment of trauma.

No special educational preparation is required for this CME activity.
